# International Reserves/Foreign Currency Liquidity

(Information to be disclosed by the monetary authorities and other central government, excluding social security)<sup>2,3</sup>

06/30/2016

### I. Official reserve assets and other foreign currency assets (approximate market value) 4

	Monetary	Central
	Authorities	Government
A. Official reserve assets	30,507.28	
(1) Foreign currency reserves (in convertible foreign currencies)	24,504.83	
(a) Securities	1,356.96	
of which: issuer headquartered in reporting country but located abroad		
(b) total currency and deposits with:	23,147.89	
(i) other national central banks, BIS and IMF	23,002.82	
(ii) banks headquartered in the reporting country		
of which: located abroad	0.00	
(iii) banks headquartered outside the reporting country	145.06	
of which: located in the reporting country		
(2) IMF reserve position	0.27	
(3) SDRs	2,872.09	
(4) gold (including gold deposits and, if appropriate, gold swapped)	2,617.27	
—volume in millions of fine troy ounces	1.98	
(5) other reserve assets (specify)	512.82	
—financial derivatives	-31.52	
—loans to nonbank nonresidents	520.75	
—other	23.58	
B. Other foreign currency assets (specify)	0.00	
—securities not included in official reserve assets		
—deposits not included in official reserve assets		
—loans not included in official reserve assets		
—financial derivatives not included in official reserve assets		
—gold not included in official reserve assets

(a) short positions	0.00	
(i) bought puts		
(ii) written calls		
(b) long positions	0.00	
(i) bought calls		
(ii) written puts		
2) To be disclosed at least once a year		
(a) currency composition of reserves (by groups of currencies)	30,507.28	
—currencies in SDR basket	19,815.01	
—currencies not in SDR basket	10,692.27	
—by individual currencies (optional)		

#### Footnotes

- 1. In principle, only instruments denominated and settled in foreign currency (or those whose valuation is directly dependent on the exchange rate and that are settled in foreign currency) are to be included in categories I, II, and III of the template. Financial instruments denominated in foreign currency and settled in other ways (e.g., in domestic currency) or commodities) are included as more interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest in the common interest interest.
- 2. Netting of positions is allowed only if they have the same maturity, are against the same counterparty, and a master netting agreement is in place. Positions on organized exchanges could also be netted.
- 3. See definition of monetary authorities in paragraph 21 of the Guidelines
- 4. In cases of large positions vis-à-vis institutions headquartered in the reporting country, in instruments other than deposits or securities, they should be reported as separate items.
- 5. The valuation basis for gold assets should be disclosed; ideally this would be done by showing the volume and price.
- 6. Including interest gavenits due within the corresponding time horizons. Foreign currency deposits held by nonresidents with central banks should also be included here. Securities referred to are those issued by the monetary authorities and the central government (excluding social security).
- 7 In the event that there are forward or futures positions with a residual maturity greater than one year, which could be subject to margin calls, these should be reported separately under Section IV
- 8. Only bonds with a residual maturity greater than one year should be reported under this item, as those with shorter maturities will already be included in Section II, above.
- 9. Reporters should distinguish potential inflows and potential outflows resulting from contingent lines of credit and report them separately, in the specified format.
- 10. In the event that there are options positions with a residual maturity greater than one year, which could be subject to margin calls, these should be reported separately under Section IV.
- 11. These "stress-tests" are an encouraged, rather than a prescribed, category of information in the IMF's Special Data Dissemination Standard (SDDS). Could be disclosed in the form of a graph. As a rule, notional value should be reported. However, in the case of cash-settled options, the estimated future inflow/outflow should be disclosed. Positions are "in the money" or would be, under the assumed values.
- 12. Distinguish between assets and liabilities where applicable.
- 13. Identify types of instrument; the valuation principles should be the same as in Sections I-III. Where applicable, the notional value of nondeliverable forward positions should be shown in the same format as for the nominal value of deliverable forwards/futures in Section II.
- 14. Only assets included in Section I that are pledged should be reported here.
- 15. Assets that are lent or reposed should be reported here, whether or not they have been included in Section I. Similarly, securities that are borrowed or acquired under repo agreements should be reported as a separate item and treated symmetrically. Market values should be reported and the accounting treatment disclosed.
- 16. Identify types of instrument. The main characteristics of internal models used to calculate the market value should be disclosed.

#### Country Notes

- (a) The "Monetary Base" of the Central Bank is backed by its international reserves, which cannot be attached and may be applied only as established in Law 26.739, as amended. The stock of the "Monetary Liabilities" as at 06/30/16 is pesos equivalent in USD 53.581,34 million and its composition is as follows: Monetary Base: pesos equivalent in USD 42.307,73 million. Earlier in USD 53.581,34 million and its composition is as follows: Monetary Base: pesos equivalent in USD 42.307,73 million. Earlier in USD 53.581,34 million. Banknotes and Coins pesos equivalent in USD 31.308,35 million and Settlement Checks in pesos: pesos equivalent in USD 10.999,37 million).
