| NOTAS Y OBSERVACIONES |
|                       |

- (1) Hasta el 31 de octubre de 2001 para compatibilizar los valores consignados en esta columna con los del Balance del Banco Central de la República Argentina se deben sustraer los movimientos netos determinados por la operatoria de pases con títulos y certificados de depósitos en dólares extranjeros (restando el saldo de la operatoria de pases pasivos para el BCRA y sumando el saldo de la operatoria de pases activos para el BCRA) y sumar las divisas equivalentes a los Depósitos del Gobierno en el BCRA.  
Entre noviembre de 2001 y el 4 de febrero de 2002, tal compatibilización puede concretarse sumando las divisas equivalentes a los Depósitos del Gobierno en el BCRA.
- (2) Para la valuación de los conceptos en moneda extranjera se consideró el tipo de cambio incluido en la columna "Tipo de cambio de valuación".
- (3) Entre el 22 de febrero de 2002 y el 31 de octubre de 2003, el Banco Central permitió la captación de depósitos a plazo fijo de 7 a 29 días de plazo.
- (4) Exclusivamente se consideran las obligaciones contraídas por entidades financieras del país con entidades financieras del exterior no vinculadas (las cuales no están relacionadas institucionalmente con la entidad financiera local ni mantienen con ella acuerdos de corresponsalía).
- (5) No se deducen los importes de las utilizaciones que la Tesorería General de la Nación efectúa de los saldos de cuentas bancarias a la orden de ministerios, secretarías y organismos descentralizados (cuyos presupuestos de gastos y cálculo de recursos integran el Presupuesto General de la Administración Nacional) dependientes del Gobierno Nacional, cuentas que son subsidiarias de la denominada "Fondo Unificado de las Cuentas del Gobierno Nacional" abierta en el Banco de la Nación Argentina. Tampoco se deducen las utilizaciones que efectúan los gobiernos provinciales de los saldos en fondos unificados de su jurisdicción
- (6) En millones de pesos. A partir de enero de 2003 y hasta el 19.3.2003 corresponde sólo a capitales e intereses devengados. Desde el 20 de marzo de 2003 se incorporan los adelantos para la compra de Bonos del Gobierno Nacional (BODEN) y sus correspondientes ajustes y a partir de diciembre de 2008 también se incluye la operatoria "Ventanilla de Liquidez del BCRA".

NOTA:

- En junio de 2011 se procedió a reclasificar, para toda la serie temporal, los depósitos privados en moneda nacional de las "Cuentas especiales para círculos cerrados" y del "Fondo de Desempleo para los Trabajadores de la Industria de la Construcción" adicionándolos junto con los depósitos en caja de ahorros (antes se los consignaba en otros depósitos).

CUADRO II-1

- (1) Depósitos y otras obligaciones sujetas a la normativa de regulación de liquidez del BCRA ("requisitos mínimos de liquidez" y/o "exigencia de efectivo mínimo").
- (2) A partir de noviembre de 1996, incluye inversiones a plazo constante, con opción de cancelación anticipada, con opción de renovación por plazo determinado y a plazo con retribución variable (referencia normativa: Com. "A" 2482). Incluye depósitos reprogramados CEDROS y Letras de plazo fijo y, a partir de marzo de 2003, los ajustes devengados por aplicación del CER.
- (3) Incluye depósitos judiciales, depósitos constituidos por fondos comunes de inversión y saldos inmovilizados de títulos valores públicos e instrumentos de regulación monetaria del B.C.R.A..

CUADRO II-2

- (1) La normativa de regulación de la liquidez establecida por el Banco Central de la República Argentina se basa en requisitos de integración mínima en la misma moneda (en caja, en cuentas corrientes de las entidades abiertas en el BCRA, son algunos de los distintos instrumentos contemplados) de los recursos derivados de depósitos y otras obligaciones en moneda nacional y extranjera.  
La normativa aplicable en el transcurso del tiempo estableció porcentajes diferentes para determinar la exigencia de integración que correspondiera observar sobre cada tipo de depósito u obligación, y ha considerado tanto su plazo (contractual, hasta julio de 1995, o residual, a partir de agosto de 1995), como a quién le corresponde la titularidad, el tipo de banco involucrado o el cumplimiento de determinadas relaciones técnicas, por mencionar algunas.  
El cálculo total de la exigencia se realiza aplicando los porcentajes establecidos a los promedios mensuales de los saldos diarios de las obligaciones comprendidas registrados al cierre de cada día durante el mes calendario (la normativa también dispone que las entidades deben mantener un saldo mínimo diario).  
En el cuadro se muestran los diferentes porcentajes establecidos por la normativa vigente en cada mes. Cuando en el mes correspondieron observar distintas exigencias, se consigna la vigente el último día.  
Cuando el concepto se refiere a la exigencia agregada de partidas con diferentes exigencias, se consigna la exigencia promedio ponderada por el promedio mensual de saldos diarios de las diferentes partidas involucradas (para diciembre de 1996 y enero de 1997, las exigencias promedio ponderadas han sido estimadas).
- (2) En determinados períodos, la normativa dispone que las entidades financieras no pueden imputar, en la integración del efectivo mínimo, más que una parte de las tenencias de billetes y monedas; para ajustar la exigencia promedio total en función de ese encaje adicional se la ha incrementado por el equivalente a la suma de los importes no imputables (en moneda nacional y en moneda extranjera) a la integración del efectivo mínimo.
- (3) Importe total de las franquicias otorgadas por el BCRA respecto del total de partidas.
- (4) En el total de las exigencias de este conjunto de conceptos se incluyen las exigencias correspondientes a:  
  
los depósitos del sector público provincial de la jurisdicción de las entidades financieras públicas no incluidas en el Anexo V a la Comunicación "A" 865 -según el régimen vigente entre el 1° de abril de 1986 y el mes de marzo de 1992-  
las exigencias adicionales (un punto porcentual adicional sobre todos los conceptos, excepto para las obligaciones a plazos residuales superiores a 365 días) establecidas para el caso en que las entidades financieras ejercieran la opción de no emitir deuda, según lo previsto en las normas sobre "Emisión y colocación obligatoria de deuda" vigente entre el 1° de junio de 2001 y febrero de 2002  
las exigencias adicionales establecidas para el caso en que se verifique una concentración excesiva de pasivos (en titulares y/o plazos) que implique un riesgo significativo respecto de la liquidez individual de una entidad financiera y/o tenga un efecto negativo importante en la liquidez sistémica, según lo previsto en las normas vigentes entre el 1° de junio de 2001 y el mes de febrero de 2002  
los defectos de aplicación de recursos en moneda nacional determinados en función de la normativa vigente en el período comprendido entre los meses de marzo de 2002 y octubre de 2003  
  
la exigencia adicional (hasta el 100%) establecida sobre los depósitos y otras obligaciones a la vista, cuya retribución supere el límite establecido, según lo previsto en las normas vigentes.
- (5) Los incumplimientos a las normas sobre capacidad prestable en moneda extranjera generan una exigencia adicional de efectivo mínimo, en esa moneda, equivalente al monto del incumplimiento.
- (6) Hasta julio de 1995 corresponde a exigencias establecidas en función del plazo contractualmente pactado en el momento en que se constituyó el depósito o se contrajo la obligación. A partir de agosto de 1995, inclusive, corresponde a las exigencias establecidas en función del plazo residual (en este caso se aplica, al promedio mensual de saldos diarios de cada mes, la estructura de plazos residuales del mes anterior).
- (7) Las exigencias derivadas de este concepto ha sido computada para la determinación de la exigencia promedio de los depósitos a plazo fijo.

CUADRO II-3

- (1) En el cuadro se consigna la posición de efectivo mínimo y el promedio mensual de saldos diarios de los conceptos imputables como integración de las exigencias de regulación de la liquidez dispuestas por la normativa vigente en cada mes.

| NOTAS Y OBSERVACIONES |
|-----------------------|
|                       |

- (2) La posición de efectivo mínimo (neta de franquicias) resulta de relacionar los promedios mensuales de saldos diarios del exceso/defecto total neto (total de conceptos imputables como integración del efectivo mínimo menos total de exigencia de efectivo mínimo) respecto del total de partidas (depósitos y otras obligaciones sujetas a la normativa de regulación de la liquidez, en monedas nacional y extranjera).
- En ciertos períodos, la normativa contempla que la exigencia e integración del efectivo mínimo en pesos se observe sobre un período mayor al mes calendario (en tales casos el promedio computable es el que surge de dividir la suma de los saldos diarios de los conceptos comprendidos registrados durante ese lapso mayor al de un mes calendario por la cantidad total de días de ese intervalo de tiempo); la posición de efectivo mínimo presentada corresponde a la medición en la extensión de cada mes calendario y por lo tanto no refleja el efecto de esas disposiciones normativas.
- Con el mismo criterio, no se refleja la posición mensual determinada correspondiente al lapso entre el día 16 del mes anterior y el día 15 del mes contemporáneo que hubiera sido contemplada en la normativa durante el período comprendido entre abril de 1993 y noviembre de 1996 (en ese período, la exigencia y la integración debieron calcularse al 15 y al último día de cada mes sobre los promedios de saldos de las partidas comprendidas registrados durante el período de cómputo -entre el 16 del mes anterior y el día 15 del mes contemporáneo y entre el primer y último día del mes contemporáneo, respectivamente).
- (3) En determinados períodos, la normativa dispone que las entidades financieras no pueden imputar, en la integración del efectivo mínimo, más que un determinado porcentaje de las tenencias de billetes y monedas; por ello, se consigna el porcentaje promedio dispuesto como límite y el importe, en promedio mensual de saldos diarios, equivalente a las tenencias de billetes y monedas que no pueden ser imputadas como integración del efectivo mínimo (el signo negativo, indica que ese importe se resta para obtener la integración total computable).
- Entre febrero de 1993 y noviembre de 1996 la normativa contempló dos niveles diferenciados (básica y complementaria) de exigencia de efectivo mínimo en pesos para cada partida comprendida, por lo tanto el monto no imputable de las tenencias de billetes y monedas fue estimado por el excedente entre el total de esas tenencias efectivas menos el total de la exigencia complementaria (exigencia que podría integrarse con esa clase de tenencias).
- (4) Corresponde al promedio mensual de saldos diarios acreedores de las cuentas especiales de garantía a favor de las cámaras electrónicas de compensación y de las demás cuentas especiales abiertas en el Banco Central de la República Argentina (operatoria vinculada con tarjetas de crédito, cajeros automáticos, etc.).

NOTAS Y OBSERVACIONES

- (1) Para la valuación de los conceptos en moneda extranjera se consideró el tipo de cambio incluido en la columna "Tipo de cambio de valuación".
- (2) No se computan las letras del BCRA (Lebac y Nobac) emitidas para ser afectadas a operaciones de pases pasivos ni las entregadas en garantía (esos conceptos, entre otros, explican las diferencias con las cifras consignadas en los estados contables del BCRA).  
Las letras del BCRA en dólares son valuadas, desde la fecha de la primera licitación hasta el presente, con el valor de la columna "Tipo de cambio de valuación" correspondiente al día hábil anterior.  
Para la determinación del monto del vencimiento solo se considera el monto efectivo de colocación (no se computan los intereses ni se proyecta el ajuste por el CER, en el caso de las letras con esa cláusula).  
Para la determinación del saldo, y del importe de los vencimientos, se han considerado las operaciones de recompra/reventa efectuadas por el BCRA (en el mercado secundario o por licitación).
- (3) Corresponde:  
hasta el 30 de diciembre de 2002, inclusive: al tipo de cambio cierre vendedor del Banco de la Nación Argentina del día hábil anterior.  
para el 31 de diciembre de 2002: al tipo de cambio de referencia de ese día.  
a partir del 2 de enero de 2003 y hasta el 26 de marzo de 2004, inclusive: al tipo de cambio de referencia del día hábil anterior.  
a partir del 29 de marzo 2004, inclusive: al tipo de cambio de referencia del día.  
El tipo de cambio de referencia es calculado por el BCRA a partir de las cotizaciones solicitadas a un conjunto de entidades, y refleja las condiciones predominantes en el mercado de cambios mayorista (referencia: Com. "A" 3500).
- (4) En millones de pesos. A partir de enero de 2003 y hasta el 19.3.2003 corresponde sólo a capitales e intereses devengados. Desde el 20 de marzo de 2003 se incorporan los adelantos para la compra de Bonos del Gobierno Nacional (BODEN) y sus correspondientes ajustes, a partir de diciembre de 2008 se incluye la operatoria "Ventanilla de Liquidez del BCRA" y a partir de junio de 2010 también se incorporan los adelantos del Banco Central con destino a financiaciones al sector productivo.
- (5) Incluye cheques cancelatorios en moneda nacional.
- (\*) Cifras provisionarias sujetas a cambio de valuación.

Las especificaciones metodológicas de cada concepto pueden ser consultadas en el texto ordenado del SIStema CENtralizado de requerimientos informativos de la Gerencia de Estadísticas Monetarias (Com. "A" 2803 que puede ser accedida en la página de Internet del Banco Central de la República Argentina -[www.bcra.gov.ar](http://www.bcra.gov.ar)).

En el caso de no contarse con información contemporánea para alguna entidad, se repite el último dato conocido.

Dado el exiguo plazo que tienen las entidades para cumplir con la transmisión electrónica de los datos y la obligatoriedad de concretar transmisiones rectificativas toda vez que tomen conocimiento de su importancia, las actualizaciones informativas de datos previos son frecuentes y pueden llegar a ser significativas por razones de estacionalidad en la concentración de los flujos financieros.

- (2) Tipo de cambio, obtenido por el BCRA a partir de las cotizaciones solicitadas a un conjunto de entidades, que refleja las condiciones predominantes en el mercado de cambios mayorista (referencia: Com. "A" 3500).
- (3) A partir del 31 de marzo de 2003, las entidades financieras debieron proceder (en función de lo establecido mediante la Comunicación "A" 3911) a reevaluar, de acuerdo con la metodología de valuación a través del valor presente de los flujos futuros de fondos, los activos del sector público no financiero. Tal disposición puede provocar variaciones en los stocks de Títulos valores públicos o de los Préstamos al sector público a explicitarse en distintos días (según la fecha en que cada entidad concrete la adecuación contable).
