(3) Incluye depósitos judiciales, depósitos constituidos por fondos comunes de inversión y saldos inmovilizados de títulos valores públicos e instrumentos de regulación monetaria del B.C.R.A..

CUADRO II-2

(1) La normativa de regulación de la liquidez establecida por el Banco Central de la República Argentina se basa en requisitos de integración mínima en la misma moneda (en caja, en cuentas corrientes de las entidades abiertas en el BCRA, son algunos de los distitntos instrumentos contemplados) de los recursos derivados de depósitos y otras obligaciones en moneda nacional y extranjera.
La normativa aplicable en el transcurso del tiempo estableció porcentajes diferentes para determinar la exigencia de integración que correspondiera observar sobre cada tipo de depósito u obligación, y ha considerado tanto su plazo (contractual, hasta julio de 1995, o residual, a partir de agosto de 1995), como a quién le corresponde la titularidad, el tipo de banco involucrado o el cumplimiento de determinadas relaciones técnicas, por mencionar algunas.
El cálculo total de la exigencia se realiza aplicando los porcentajes estabecidos a los promedios mensuales de los saldos diarios de las obligaciones comprendidas registrados al cierre de cada día durante el mes calendario (la normativa también dispone que las entidades deben mantener un saldo mínimo diario).
En el cuadro se muestran los diferentes porcentajes establecidos por la normativa vigente en cada mes. Cuando en el mes correspondieron observar distintas exigencias, se consigna la vigente el último día.
Cuando el concepto se refiere a la exigencia agregada de partidas con diferentes exigencias, se consigna la exigencia promedio ponderada por el promedio mensual de saldos diarios de las diferentes partidas involucradas (para diciembre de 1996 y enero de 1997, las exigencias promedio ponderadas han sido estimadas).

(2) En determinados períodos, la normativa dispone que las entidades financieras no pueden imputar, en la integración del efectivo mínimo, más que una parte de las tenencias de billetes y monedas; para ajustar la exigencia promedio total en función de ese encaje adicional se la ha incrementado por el equivalente a la suma de los importes no imputables (en moneda nacional y en moneda extranjera) a la integración del efectivo mínimo.

(3) Importe total de las franquicias otorgadas por el BCRA (netas de aquellos conceptos que en realidad implican incrementos de la exigencia dispuestos para los casos en que no se cumplan determinadas resoluciones normativas) respecto del total de partidas.
A partir de julio de 2013, también se computa el incremento de la exigencia establecido por incumplimientos a las normas sobre “Línea de crédito para la inversión productiva”.
A partir de abril de 2012 incluye la disminución de la exigencia por un importe equivalente al porcentaje establecido en el cronograma correspondiente (100% hasta set. de 2012, 75% en oct. y nov. de 2012 y del 25% desde dic. 2012 hasta feb. 2013) de la integración realizada en marzo de 2012 con efectivo, efectivo en tránsito y en empresas transportadoras de caudales (luego de computar las restantes partidas admitidas como integración y sin exceder el importe necesario para alcanzar la posición de equilibrio).
A partir agosto de 2013 incluye, además, la disminución de la exigencia establecida en función de los retiros de efectivo realizados a través de cajeros automáticos de la entidad.
A partir de julio 2014 incluye, además, el incremento de la exigencia por incumplimientos verificados sobre el nivel de tasas máximas establecidas para financiaciones en pesos (Comunicación "A" 5590)
A partir de setiembre de 2014 incluye, además, la disminución de la exigencia en pesos en función de las acreditaciones de ANSES.
En cuanto a las franquicias netas otorgadas por operaciones con MiPyMES:
A partir de diciembre de 2012 comprende, además, la disminución de la exigencia establecida en función de la participación de las financiaciones a Micro, Pequeñas y Medianas Empresas (MiPyMES) en el total de financiaciones al sector privado no financiero
A partir de julio 2014 incluye, además, la disminución de la exigencia correspondiente al importe de las financiaciones desembolsadas a MiPyMEs, que se computan como reversión del incremento de la exigencia de efectivo mínimo en pesos por incumplimientos

(4) En el total de las exigencias de este conjunto de conceptos se incluyen las exigencias correspondientes a:

los depósitos del sector público provincial de la jurisdicción de las entidades financieras públicas no incluidas en el Anexo V a la Comunicación “A” 865 -según el régimen vigente entre el 1° de abril de 1986 y el mes de marzo de 1992-
las exigencias adicionales (un punto porcentual adicional sobre todos los conceptos, excepto para las obligaciones a plazos residuales superiores a 365 días) establecidas para el caso en que las entidades financieras ejercieran la opción de no emitir deuda, según lo previsto en las normas sobre “Emisión y colocación obligatoria de deuda” vigente entre el 1° de junio de 2001 y febrero de 2002
las exigencias adicionales establecidas para el caso en que se verifique una concentración excesiva de pasivos (en titulares y/o plazos) que implique un riesgo significativo respecto de la liquidez individual de una entidad financiera y/o tenga un efecto negativo importante en la liquidez sistémica, según lo previsto en las normas vigentes entre el 1° de junio de 2001 y el mes de febrero de 2002
los defectos de aplicación de recursos en moneda nacional determinados en función de la normativa vigente en el período comprendido entre los meses de marzo de 2002 y octubre de 2003

la exigencia adicional (hasta el 100%) establecida sobre los depósitos y otras obligaciones a la vista, cuya retribución supere el límite establecido, según lo previsto en las normas vigentes.

NOTAS Y OBSERVACIONES

(5) Los incumplimientos a las normas sobre capacidad prestable en moneda extranjera generan una exigencia adicional de efectivo mínimo, en esa moneda, equivalente al monto del incumplimiento.

(6) Hasta julio de 1995 corresponde a exigencias establecidas en función del plazo contractualmente pactado en el momento en que se constituyó el depósito o se contrajo la obligación. A partir de agosto de 1995, inclusive, corresponde a las exigencias establecidas en función del plazo residual (en este caso se aplica, al promedio mensual de saldos diarios de cada mes, la estructura de plazos residuales del mes anterior).

(7) Las exigencias derivadas de este concepto ha sido computada para la determinación de la exigencia promedio de los depósitos a plazo fijo.

CUADRO II-3

(1) En el cuadro se consigna la posición de efectivo mínimo y el promedio mensual de saldos diarios de los conceptos imputables como integración de las exigencias de regulación de la liquidez dispuestas por la normativa vigente en cada mes.

(2) La posición de efectivo mínimo (neta de franquicias) resulta de relacionar los promedios mensuales de saldos diarios del exceso/defecto total neto (total de conceptos imputables como integración del efectivo mínimo menos total de exigencia de efectivo mínimo) respecto del total de partidas (depósitos y otras obligaciones sujetas a la normativa de regulación de la liquidez, en monedas nacional y extranjera).

En ciertos períodos, la normativa contempla que la exigencia e integración del efectivo mínimo en pesos se observe sobre un período mayor al mes calendario (en tales casos el promedio computalbe es el que surge de dividir la suma de los saldos diarios de los conceptos comprendidos registrados durante ese lapso mayor al de un mes calendario por la cantidad total de días de ese intervalo de tiempo); la posición de efectivo mínimo presentada corresponde a la medición en la extensión de cada mes calendario y por lo tanto no refleja el efecto de esas disposiciones normativas.

Con el mismo criterio, no se refleja la posición mensual determinada correspondiente al lapso entre el día 16 del mes anterior y el día 15 del mes contemporáneo que hubiera sido contemplada en la normativa durante el período comprendido entre abril de 1993 y noviembre de 1996 (en ese período, la exigencia y la integración debieron calcularse al 15 y al último día de cada mes sobre los promedios de saldos de las partidas comprendidas registrados durante el período de cómputo -entre el 16 del mes anterior y el día 15 del mes contemporáneo y entre el primer y último día del mes contemporáneo, respectivamente).

(3) En determinados períodos, la normativa dispone que las entidades financieras no pueden imputar, en la integración del efectivo mínimo, más que un determinado porcentaje de las tenencias de billetes y monedas; por ello, se consigna el porcentaje promedio dispuesto como límite y el importe, en promedio mensual de saldos diarios, equivalente a las tenencias de billetes y monedas que no pueden ser imputadas como integración del efectivo mínimo (el signo negativo, indica que ese importe se resta para obtener la integración total computable).

Entre febrero de 1993 y noviembre de 1996 la normativa contempló dos niveles diferenciados (básica y complementaria) de exigencia de efectivo mínimo en pesos para cada partida comprendida, por lo tanto el monto no imputable de las tenencias de billetes y monedas fue estimado por el excedente entre el total de esas tenencias efectivas menos el total de la exigencia complementaria (exigencia que podría integrarse con esa clase de tenencias).

(4) Corresponde al promedio mensual de saldos diarios acreedores de las cuentas especiales de garantía a favor de las cámaras electrónicas de compensación y de las demás cuentas especiales abiertas en el Banco Central de la República Argentina (operatoria vinculada con tarjetas de crédito, cajeros automáticos, etc.).

NOTAS Y OBSERVACIONES

(1) Para la valuación de los conceptos en moneda extranjera se consideró el tipo de cambio incluido en la columna "Tipo de cambio de valuación".

(2) No se computan las letras del BCRA (Lebac y Nobac) emitidas para ser afectadas a operaciones de pases pasivos ni las entregadas en garantía (esos conceptos, entre otros, explican las diferencias con las cifras consignadas en los estados contables del BCRA).
Las letras del BCRA en dólares son valuadas, desde la fecha de la primera licitación hasta el presente, con el valor de la columna "Tipo de cambio de valuación" correspondiente al día hábil anterior.
Para la determinación del monto del vencimiento solo se considera el monto efectivo de colocación (no se computan los intereses ni se proyecta el ajuste por el CER, en el caso de las letras con esa cláusula).
Para la determinación del saldo, y del importe de los vencimientos, se han considerado las operaciones de recompra/reventa efectuadas por el BCRA (en el mercado secundario o por licitación), como así también las Letras Internas del Banco Central de la República Argentina (LEBACs) en pesos liquidables por el Tipo de Cambio de Referencia Com. “A” 3500 a partir del 17 de diciembre de 2015.
No incluye LELIQ.

(3) Corresponde:
hasta el 30 de diciembre de 2002, inclusive: al tipo de cambio cierre vendedor del Banco de la Nación Argentina del día hábil anterior.
para el 31 de diciembre de 2002: al tipo de cambio de referencia de ese día.
a partir del 2 de enero de 2003 y hasta el 26 de marzo de 2004, inclusive: al tipo de cambio de referencia del día hábil anterior.
a partir del 29 de marzo 2004, inclusive: al tipo de cambio de referencia del día.
El tipo de cambio de referencia es calculado por el BCRA a partir de las cotizaciones solicitadas a un conjunto de entidades, y refleja las condiciones predominantes en el mercado de cambios mayorista (referencia: Com. "A" 3500).

(4) En millones de pesos. A partir de enero de 2003 y hasta el 19.3.2003 corresponde sólo a capitales e intereses devengados. Desde el 20 de marzo de 2003 se incorporan los adelantos para la compra de Bonos del Gobierno Nacional (BODEN) y sus correspondientes ajustes, a partir de diciembre de 2008 se incluye la operatoria "Ventanilla de Liquidez del BCRA" y a partir de junio de 2010 también se incorporan los adelantos del Banco Central con destino a financiaciones al sector productivo.

(5) Incluye cheques cancelatorios en moneda nacional.

(6) A partir de julio de 2013 se incluyen los Certificados de depósito para la inversión (CEDIN) (referencia normativa: Ley N° 26860, art.2°; Com "A" 5447)(información específica de ambos conceptos puede ser obtenida consultando las comunicaciones "C" semanales sobre pasivos monetarios del BCRA).

(7) De acuerdo con los establecido en el punto 7 de la Resolución de Directorio N° 44 del 28/01/2016, se informa que el monto de la columna " Divisas - Pase Pasivo en Dólares con el Exterior”, no podrá ser considerado como Reservas Excedentes

En el caso de no contarse con información contemporánea para alguna entidad, se repite el último dato conocido.

Dado el exiguo plazo que tienen las entidades para cumplir con la transmisión electrónica de los datos y la obligatoriedad de concretar transmisiones rectificativas toda vez que tomen conocimiento de su importancia, las actualizaciones informativas de datos previos son frecuentes y pueden llegar a ser significativas por razones de estacionalidad en la concentración de los flujos financieros.

(2) Tipo de cambio, obtenido por el BCRA a partir de las cotizaciones solicitadas a un conjunto de entidades, que refleja las condiciones predominantes en el mercado de cambios mayorista (referencia: Com. "A" 3500).

(3) A partir del 31 de marzo de 2003, las entidades financieras debieron proceder (en función de lo establecido mediante la Comunicación "A" 3911) a revaluar, de acuerdo con la metodología de valuación a través del valor presente de los flujos futuros de fondos, los activos del sector público no financiero.
Tal disposición puede provocar variaciones en los stocks de Títulos valores públicos o de los Préstamos al sector público a explicitarse en distintos días (según la fecha en que cada entidad concrete la adecuación contable).

- A partir del día 7 de cada mes y el último día del mismo mes, sobre la base de la tasa media geométrica calculada sobre la variación del Índice de Precios al Consumidor (IPC) (hasta el 6 de febrero de 2014) y del Índice de Precios al Consumidor Nacional Urbano (IPCNu) (a partir del 7 de febrero de 2014) del mes anterior.
- Para los días comprendidos entre el primero de cada mes y el 6 del mismo, la tasa media geométrica calculada sobre la variación del IPC entre el segundo y el tercer mes anterior al mes en curso.
A partir del 7 de diciembre de 2015, el cálculo del CER se realiza sobre la base de la tasa media geométrica calculada sobre la variación del Índice de Precios al Consumidor de la Ciudad Autónoma de Buenos Aires (IPCBA), según Resoluciones 5/2016, 17/2016 y 45/2016 del Ministerio de Hacienda y Finanzas Públicas.
Para el período 26 de marzo de 2016 hasta 25 de junio de 2016, ambas fechas inclusive, el cálculo del CER se realizó sobre la base de la tasa media geométrica calculada sobre la variación del Índice de Precios al Consumidor de la Provincia de San Luis (IPCSL), según Resoluciones 100/2016, 152/2016 y 187/2016 del Ministerio de Hacienda y Finanzas Públicas.

Con este color de fondo en una celda se pretende señalar que el concepto no está contemplado en la reglamentación aplicable según la normativa vigente para el mes (cuando se consigna un valor el mismo tiene carácter meramente referencial y surge de la información estadística más aproximada disponible al momento de la elaboración de este cuadro).
(3) Vigentes hasta el día 24, inclusive. A partir del día 27 corresponde considerar 25,91% y 26.40%, según se apliquen para depósitos de hasta 119 días o de 120 y más días de plazo, respectivamente (establecido por Com. "A" 5781)
(4) Vigentes hasta el día 16, inclusive.

CUADRO XIV-11

Referencia normativa: Com. "A" 5945 y Com. "A" 6069

El valor de cada “UVA” es el que surge de la siguiente expresión:
$14,05 x (“CER” tc-1 /“CER” t0)
Donde:
$14,05 (en pesos, con dos decimales): costo de construcción de un milésimo de metro cuadrado de vivienda al 31.03.16 -obtenido a partir del promedio simple para la Ciudad Autónoma de Buenos Aires y las ciudades de Córdoba, Rosario, Salta y zona del Litoral -Paraná y Santa Fé- del último dato disponible del costo de construcción de viviendas de distinto tipo-.
“CER” t0: índice del 31.03.16.
“CER” tc-1: índice del día hábil bancario anterior a la fecha de constitución de la imposición.

CUADRO XIV-13

Referencia normativa: Com. "A" 6069 y Res. del Directorio del BCRA N° 367.

El valor de cada “UVI” es el que surge de la siguiente expresión:
$14,05 x (“CAICC” $_{tc-1}$ /“CAICC” $_{t0}$)
Donde:
$14,05 (en pesos, con dos decimales): costo de construcción de un milésimo de metro cuadrado de vivienda al 31.03.16 -obtenido a partir del promedio simple para la Ciudad Autónoma de Buenos Aires y las ciudades de Córdoba, Rosario, Salta y zona del Litoral -Paraná y Santa Fé- del último dato disponible del costo de construcción de viviendas de distinto tipo-.
“CAICC” $_{t0}$: índice del 31.03.16.
“CAICC” $_{tc-1}$: índice del día hábil bancario anterior a la fecha de constitución de la imposición.

Metodología para la determinación del “coeficiente de ajuste por el índice del costo de la construcción” (CAICC):

El CAICC se construirá para las fechas anteriores al 19.7.16 -conforme a las metodologías utilizadas para la determinación del Coeficiente de Estabilización de Referencia (CER) para esas mismas fechas- utilizando el Índice del costo de la construcción en el Gran Buenos Aires (ICC) para vivienda unifamiliar modelo 6 publicado por el Instituto Nacional de Estadística y Censos (INDEC) en lugar de los índices de precios al consumidor utilizados, en las mismas fechas, para el cálculo del CER.

A partir del 20.7.16, y en lo sucesivo a partir del 20 de cada mes y hasta el 19 del mes siguiente, ambas fechas inclusive, el CAICC se calculará en base a la tasa media geométrica calculada sobre la variación del ICC para vivienda unifamiliar modelo 6 del mes anterior.

El factor diario (Ft) utilizado para actualizar el CAICC será el resultado de la siguiente expresión:
Ft = ((ICC)j-1/(ICC)j-2) ^1/k
donde:
F = factor diario de actualización del CAICC.
k = número de días correspondiente al mes en curso.
j = mes en curso.
(ICC)j-1 = valor del ICC para vivienda unifamiliar modelo 6 en el mes precedente a aquél en que se determina el CAICC.
(ICC)j-2 = valor del ICC para vivienda unifamiliar modelo 6 dos (2) meses antes a aquél en que se determina el CAICC.

Se tomará el valor del ICC para vivienda unifamiliar modelo 6 publicado por primera vez para un determinado mes por el INDEC. Si luego de difundidos los valores de las UVI el INDEC procediera a modificar los índices o las tasas de variación que por primera vez hubiera comunicado para el ICC, no se recalculará el CAICC ni los valores de la UVI.

De esta forma, el CAICC se construirá mediante el siguiente cálculo:
CAICCt = Ft x CAICCt-1

Dada una tabla de CAICC diarios, cuando se proceda a computar el ajuste entre dos (2) fechas (entre s y s+r) el factor a aplicar surgirá del cociente entre el coeficiente del día de actualización (s+r) y el coeficiente del día de inicio (s).

La base del CAICC es igual a 1 para el 25.3.16.

XVI - OBS.

NOTAS Y OBSERVACIONES

(1) Total de préstamos de efectivo otorgados por la totalidad de las entidades financieras a residentes en el país. No incluye los préstamos de títulos valores o de otros activos financieros ni préstamos de efectivo con garantía de esos valores.
Comprende los derivados de adelantos en cuenta (corriente u otras a la vista) o de la compra de documentos, los instrumentados bajo la modalidad de documentos a sola firma, documentos descontados, los préstamos hipotecarios, prendarios, personales y a titulares del sistema de tarjetas de crédito y cualquier otro préstamo de efectivo no comprendido en los anteriores.
Los importes corresponden a la distribución del total de préstamos consignado en el balance mensual de acuerdo con la participación relativa determinada para cada actividad económica y para cada distrito geográfico según la información "Préstamos a residentes en el país clasificados por la actividad económica principal del receptor" (tarea SISCEN-0014) suministrada por la totalidad de las entidades financieras de acuerdo con las especificaciones metodológicas establecidas.
Tales especificaciones pueden ser consultadas en el texto ordenado del SIStema CENtralizado de requerimientos informativos de la Gerencia de Estadísticas Monetarias (Com. "A" 2803 y complementarias) que puede ser accedido en la página de Internet del Banco Central de la República Argentina especificando la dirección http://www.bcra.gov.ar/pdfs/estadistica/siscen1.pdf (Tarea SISCEN - 0014) o seleccionando las siguientes opciones en la navegación manual a través de la página www.bcra.gov.ar: estadísticas | monetarias y financieras | metodologías del pedido de información.

(2) Total de préstamos de efectivo otorgados por la totalidad de las entidades financieras a residentes en el país que se encuentren en "situación normal". No incluye los préstamos de títulos valores o de otros activos financieros ni préstamos de efectivo con garantía de esos valores.
Se considera que un préstamo está en condición normal cuando, habiendo sido otorgado a un deudor clasificado en categoría 1. ("en situación normal" de la clasificación de deudores comerciales y "cumplimiento normal" de la clasificación de créditos para consumo o vivienda, establecidas por el BCRA), no registre atrasos mayores a 31 días. Por lo tanto no se incluyen los saldos de préstamos a deudores no clasificados en categoría 1. ni los préstamos que presenten atrasos de más de 31 días.
Comprende los préstamos derivados de adelantos en cuenta (corriente u otras a la vista) o de la compra de documentos, los instrumentados bajo la modalidad de documentos a sola firma, documentos descontados, los préstamos hipotecarios, prendarios, personales y a titulares del sistema de tarjetas de crédito y cualquier otro préstamo de efectivo no comprendido en los anteriores.
Los importes corresponden a la distribución del total de préstamos consignado en el balance mensual de acuerdo con la participación relativa determinada para cada actividad económica, para cada distrito geográfico y para los préstamos en situación normal según la información "Préstamos a residentes en el país clasificados por la actividad económica principal del receptor" (tarea SISCEN-0014) suministrada por la totalidad de las entidades financieras de acuerdo con las especificaciones metodológicas establecidas.
Tales especificaciones pueden ser consultadas en el texto ordenado del SIStema CENtralizado de requerimientos informativos de la Gerencia de Estadísticas Monetarias (Com. "A" 2803 y complementarias) que puede ser accedido en la página de Internet del Banco Central de la República Argentina especificando la dirección http://www.bcra.gov.ar/pdfs/estadistica/siscen1.pdf (Tarea SISCEN - 0014) o seleccionando las siguientes opciones en la navegación manual a través de la página www.bcra.gov.ar: estadísticas | monetarias y financieras | metodologías del pedido de información.

(3) Tasa de interés promedio aplicada en el mes de la información en la concesión de préstamos de efectivo a tasa fija y en el cálculo de los intereses correspondientes a los saldos de los adelantos en cuenta o de las financiaciones del sistema de tarjetas de crédito.

La tasa de interés informada por cada entidad financiera corresponde al promedio ponderado por monto del total -cualquiera sea su instrumentación- de los préstamos concedidos en todo el mes (resultado de dividir la suma de los productos de los montos y de las tasas individuales por la suma de los montos), considerando:el promedio de los saldos diarios del mes, para el caso de los adelantos; el saldo adeudado de la anteúltima liquidación (según lo determinado en el extracto enviado en la última liquidación), tratándose de cuentas del sistema de tarjetas de crédito; o el capital efectivamente desembolsado en el mes para toda otra operación de préstamo (deduciendo los intereses documentados).

Para obtener un valor promedio para todas las entidades financieras -para cada actividad económica y para cada provincia-, las tasas de interés se han ponderado por el saldo de los préstamos vigentes (según lo informado por cada entidad financiera de acuerdo con lo detallado en el párrafo anterior).

Como consecuencia de tal metodología de cálculo, la tasa de interés indicada en el cuadro puede ser interpretada como la tasa de interés aplicada en el mes de la información por las entidades financieras, otorgantes de préstamos en ese período, que mayor participación mantienen (por el total -cualquiera sea su instrumentación- de préstamos concedidos en ese mes o por la vigencia de los concedidos en meses anteriores) en la financiación a la actividad económica de que se trate.

(4) Actividad económica principal del receptor del préstamo.
Para determinar la actividad principal del receptor de la asistencia financiera las entidades financieras deben tener en cuenta la mayor cantidad de elementos de juicio (disponibles para la apertura de la carpeta de crédito) de manera de asegurar una correcta clasificación. El valor agregado, los ingresos brutos, son medidas idóneas para proceder a la clasificación que se requiere, pero no son las únicas y pueden ser complementadas a criterio de la unidad informativa.

El procedimiento de clasificación requiere que las entidades financieras sigan los pasos detallados en "CLASIFICACION NACIONAL DE ACTIVIDADES ECONOMICAS 1997 - Notas Explicativas, Serie Nomencladores y Correspondencias Nº2, Secretaría de Programación Económica, INDEC" (Capítulo 4. Determinación de la actividad principal de una unidad declarante por medio del método descendente).

(5) Fecha a la que corresponden los saldos de los préstamos. En el caso de las tasas de interés, corresponde al mes en el que fueron otorgados, al mes en el que han tenido vigencia los saldos diarios (en el caso de los adelantos) o al mes en que se liquidaron las financiaciones del sistema de tarjetas de crédito.

(6) Tipo de moneda en la que se han otorgado los préstamos.

(7) Los saldos de los préstamos en moneda extranjera, expresados en dólares estadounidenses, se convierten a pesos utilizando el tipo de cambio vendedor del Banco de la Nación Argentina (hasta diciembre de 2001) o, a partir de esa fecha, el "Tipo de cambio de referencia" (tipo de cambio, calculado por el BCRA a partir de las cotizaciones solicitadas a un conjunto de entidades, que refleja las condiciones predominantes en el mercado de cambios mayorista -referencia: Com. "A" 3500-); el valor del tipo de cambio de referencia fue de:.

20171231 18.7742 pesos por dólar estadounidense.

Cuando una entidad informa datos que suponen una clasificación defectuosa, incompleta o dudosa (por ejemplo: cuando sólo informan un concepto de clasificación para un determinado ordenamiento) los datos se consideran como "No clasificados".

Si los datos de una entidad son considerados como "No clasificados" para el total o para alguno de los distintos tipos de préstamos o depósitos, también son considerados como "No clasificados" en el total o en cada uno de los restantes tipos de préstamos o depósitos, respectivamente (no se traslada la recategorización de préstamos a depósitos o de depósitos a préstamos).
La diferencia que pudiera existir entre los datos informados en el marco de este régimen informativo y los datos de balance (discrepancia estadística) también se considera dentro del saldo correspondiente a la categoría "No clasificado".

Los datos del concepto "no clasificado" de cada ordenamiento se asignan a cada uno de los ítems correspondientes de acuerdo con la ponderación individual que se observe para cada ítem según surja de las informaciones consideradas correctamente clasificadas.

(2) Corresponde al porcentaje que representan los datos de la categoría "No clasificados" en el total de cada agrupamiento (el porcentaje de los préstamos o depósitos de cada agrupamiento que han sido considerados como préstamos o depósitos de clasificación dudosa y que se han asignado a cada ítem en función del peso ponderado según surge de la agregación de los datos adecuadamente clasificados).

En el caso de no contarse con información contemporánea para alguna entidad, se repite el último dato conocido.
Cuando una entidad informa datos que suponen una clasificación defectuosa, incompleta o dudosa (por ejemplo: cuando sólo informan un concepto de clasificación para un determinado ordenamiento) los datos se consideran como "No clasificados".

La diferencia que pudiera existir entre los datos informados en el marco de este régimen informativo y los datos de balance (discrepancia estadística) también se considera dentro del saldo correspondiente a la categoría "No clasificado".

Los datos del concepto "no clasificado" de cada ordenamiento se asignan a cada uno de los ítems correspondientes de acuerdo con la ponderación individual que se observe para cada ítem según surja de las informaciones consideradas correctamente clasificadas.

(2) Corresponde al procentaje que representan los datos de la categoría "No clasificados" en el total de cada agrupamiento (el porcentaje de los préstamos de cada agrupamiento que han sido considerados como préstamos de clasificación dudosa y que se han asignado a cada ítem en función del peso ponderado según surge de la agregación de los datos adecuadamente clasificados).
